DNR: Department of Natural Resources		

Community Engagement Results

The following section provides a complete summary of community engagement results received during the Comprehensive Planning process.

Comment Map

The heat map to the right shows areas in the City that received the most comments. Comment types were split relatively evenly across the six comment themes (Bike, Pedestrian, & Transit, Community Assets, Culture & Historic Resources, Housing, Opportunities, Recreation & Natural Resources) with the exception of “Bike, Pedestrian, & Transit” (45.7%) and “Opportunities” (26.3%), which received slightly more comments. The comment map received over 800 comments from community members across the six categories.

Community Survey

The community survey was made available from April-December 2022. The results and major themes are discussed in this section, along with a description of the demographics of survey respondents. The results served to inform the vision and priorities of the Comprehensive Plan. Results of the community survey are included on the following pages.

Community Survey Demographic Results

The graphs below describe the demographic trends of survey respondents.

What is your age?

How long have you lived in La Crosse?

What option best describes your ethnicity?

If you're a resident, in which Council District do you live?

Community Survey Demographic Results (continued)

If you're a resident, what neighborhood do you live in?

How many adults are in your household?

How many children (under 18) are in your household?

Which gender do you identify with?

Community Survey Demographic Results (continued)

What is the highest level of education you received?

Community Survey Results

What are your preferred methods of receiving communication from the City? (Select up to 3)

If you're a resident, what are the top reasons you choose to live in the City of La Crosse? (Select up to 3)

What services have the biggest impact on your quality of life? (Select up to 3)

What primary factors improve the quality of life in La Crosse? (Select up to 3)

Do you feel there is a need for additional housing in La Crosse?

Which do you most agree with in terms of economic development? (Select up to 2)

If you answered "Yes" to the previous question, what types of housing do you feel are needed? (Select up to 3)

What are your top three desired downtown amenities? (Select up to 3)

Community Survey Results (continued)

What are the most important environmental items to you? (Select up to 2)

What are your top recreational priorities? (Select up to 3)

What are the most important resources to protect? (Select up to 2)

What improvements to the transportation system would most benefit you? (Select up to 3)

La Crosse Neighborhoods Survey Results

The Neighborhoods Survey asked respondents to share their thoughts on topics regarding neighborhood revitalization, safety, appearance, growth, and challenges. The results are shown in the graphs below.

One of the major goals from the 2002 Comprehensive Plan was to “Revitalize traditional neighborhoods and protect and improve single family housing.” Do you feel this was accomplished?

Are neighborhoods across the City seen as being “safe”?

Are property maintenance concerns commonly addressed in a timely manner?

The large amount of rental property in the City can contribute to neighborhood deterioration and instability because renters may not have a vested interest in maintaining or improving property and tend to be fairly transient. Do you feel this is an ongoing

Are neighborhoods adequately delineated by gateways such as monument signs, public art, distinctive landscaping, or banners?

Do you feel hospital and college growth is supported in La Crosse’s neighborhoods?

Economic Development Survey Results

The Economic Development Survey was targeted to members of La Crosse's business community to share their thoughts on topics regarding economic development. The results are shown in the graphs below.

What do you feel are the City's economic strengths (Select up to 2)?

Do you feel there are sufficient opportunities to secure a living wage job (such that you can cover your living costs within a 40-hour work week) in the City?

Economic Development Survey Results (continued)

Which of the following factors do you feel are the most pressing to address from an economic development perspective (Select up to 3)?

Which industries do you feel have the most potential for growth in the City over the next 5-10 years? (Select up to 3)

Natural Resources, Parks, and Recreation Survey Results

This survey asked in-depth questions related to La Crosse's natural ecosystems, parks, and recreational assets. The results are shown in the graphs below.

Do the recreation facilities in La Crosse address all community needs?

Do you feel that important parks, recreation areas, and sensitive natural resources like wetland, riparian, and woodland resources are protected from the impacts of development?

Are parks and recreation areas across the City seen as being safe?

Which parks, recreation, and/or open space areas do you feel are most susceptible or most at-risk to the negative impacts of climate change? (select all that apply)

Transportation Survey Results

The Transportation Survey asked respondents to share their thoughts on different modes of transportation and transportation facilities in La Crosse. The results are shown in the graphs below.

**What are your primary modes of travel within the City of La Crosse?
(Select up to 3)**

Which priorities should the City focus on to improve and maintain the City's transportation system? (Select up to 3)

What modes of travel do you have access to? (Select all that apply)

What modes of travel have you used within the City of La Crosse in the past year? (Select all that apply)

Transportation Survey Results (continued)

What improvements would increase your use of public transit in La Crosse?
(Select up to 2)

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Somewhat Safe"

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Mostly Safe"

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Neutral"

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Unsure"

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Somewhat Unsafe"

Do you feel La Crosse’s transportation system is safe for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of respondents that answered "Mostly Unsafe"

Do you feel La Crosse’s transportation system is convenient for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of residents who answered "Mostly Convenient"

Transportation Survey Results (continued)

Do you feel La Crosse’s transportation system is convenient for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of residents who answered "Somewhat Convenient"

Do you feel La Crosse’s transportation system is convenient for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of residents who answered "Mostly Inconvenient"

Do you feel La Crosse’s transportation system is convenient for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of residents who answered "Unsure"

Do you feel La Crosse’s transportation system is convenient for all modes of transportation (walkers, bicyclers, drivers, etc.)? Percentage of residents who answered "Neutral"

Historic Preservation Survey Results

The Historic Preservation Survey focused on open-ended questions regarding historic properties and preservation in La Crosse. Therefore, key themes are summarized below in narrative form instead of graphs:

- The majority of respondents indicated that historic preservation is very important for La Crosse because it defines the City's character and differentiates the City
- Respondents indicated the following as major obstacles to historic preservation:
 - Cost of upkeep/funding challenges
 - Lack of options for retrofit to ADA/fire safety regulations/new codes
 - Functionality/desire for multi-use buildings
- Respondents indicated the following as historic and/or cultural resources that are under-represented:
 - Native American/indigenous heritage/history
 - Immigrant heritage/history
 - Black cultural resources
 - Hmong heritage/history
- Respondents indicated the following should be prioritized moving forward:
 - Preserving multi-perspective histories
 - Increasing funding
 - Identification of high-priority vulnerable properties
 - More opportunities for public involvement

Disability Access Survey Results

The Disability Access Survey focused on open-ended questions regarding disability access in La Crosse. Therefore, key themes are summarized below in narrative form instead of graphs:

- Respondents indicated that improvements in bike trails and marked bike lanes have helped improve disability access
- Respondents indicated the City has been unsuccessful in the following areas of improving disability access:
 - Snow removal from private property owners is an issue
 - Disability access in parks/more benches to sit and catch your breath
 - Curb cuts tend to direct people into traffic rather than across the street directly
 - Crossing on all legs of intersections (particularly Cameron/4th, Cass/4th, La Crosse St/Copeland/3rd/4th)
 - Marsh trails could be paved to increase accessibility
 - Railings on ramps are helpful
 - Clearing snow in the winter is a big priority
- Respondents indicated there is a need for broader awareness of the different transportation modes available for disabled individuals (such as rides to/from doctors appointments)
- Respondents were generally in favor of maintaining exterior appearances of historic buildings but favored even simple modernizations to increase accessibility, such as ramps, elevators, and bathroom updates
- Respondents were generally in favor of enhancing the representation of disabled individuals on City committees

Visual Preference Survey Results

The Visual Preference Survey gave respondents an opportunity to indicate their preferences for how buildings, districts, open spaces, and corridors are designed in La Crosse. The survey presented a series of sample images in different categories (including urban neighborhoods, main streets, parks, public spaces, natural environments and wildlife habitats, green infrastructure, public art, single-and-multi-family residences, streets, parking, bike lanes, and wayfinding and signage) and asked respondents to select the images they felt were appropriate or appealing for La Crosse. Respondents could also submit their own images and leave comments indicating why they liked or disliked certain image characteristics. The following narrative identifies major themes from the results of the Visual Preference Survey:

- Respondents generally indicated preferences for a mix of living environments emphasizing walkability, space for nature/greenery, with historic and more modern architecture seamlessly mixed
- Respondents were generally in favor of mixed zoning and shopping and dining options within walking distance of residences
- Colorful facades, a warm, inviting environment, and business variety were prominent preferences for La Crosse's main streets
- Respondents expressed a desire for space for people, not just cars, on La Crosse's main streets
- Respondents emphasized preferences for parks with a balance of function, style, and natural space
- Mature trees, natural surfaces, accessible spaces/activities for all ages, and updated facilities were mentioned as preferences for parks

Visual Preference Survey Results (continued)

- Preferences focus on public spaces that are inviting/welcoming, that incorporate more greenery (grass and mature shade trees) and less man-made elements, incorporate art/creativity, and allow space for individuals or small gatherings
- Preferences for La Crosse's natural environments and wildlife habitats focus on native plants/animals and a diversity of natural landscapes that showcase the region's beauty, accessibility for all to enjoy natural areas, education opportunities, and allowing natural areas to be "messy" rather than overly manicured
- Respondents indicated green infrastructure should be used to limit motor vehicle traffic and help create space for pedestrians and biking
- Respondents viewed permeable pavement favorably to help control stormwater
- Respondents generally expressed support for adding more green elements including flowers, shrubs, swales, and trees
- Respondents indicated a preference for public art that features local artists and inclusive and diverse perspectives and history
- Respondents indicated a preference for public art that is low-maintenance, interactive, and colorful
- Murals and natural materials were favored for public art in La Crosse
- Respondents indicated a preference for a variety of housing types and styles that maintain La Crosse's unique City character, generally on smaller lots with sustainable maintenance requirements
- Respondents indicated a preference for exploring new ways to utilize existing or historic buildings for multi-family housing options, especially with mixed-use options
- Respondents generally steered towards lower footprint buildings rather than large apartment complexes
- Respondents indicated a preference for natural elements along streets (greenery, trees)
- Respondents indicated a preference for more space for sustainable, multi-modal commuting (walking, biking) with wider sidewalks and narrower impervious surface elements
- Respondents were not in favor of large expanses of uninterrupted pavement used for parking – incorporating vegetation including trees for shade, angled parking, permeable pavement, and multi-level parking options were highlighted as preferable designs
- Respondents were interested in exploring options for underground parking
- Respondents were strongly in favor of physically separated/protected bike lanes
- For wayfinding and signage, respondents were generally in favor of attractive yet functional and easy-to-read wayfinding and signage elements that are unique to La Crosse

Voting Game Results

The Voting Game asked respondents to identify their top 5 priorities to focus on in the Comprehensive Plan. Survey respondents prioritized environmental and equity issues over ones of economic development.

Guiding Principles Survey Results

The results of the Guiding Principles Survey also mirror the results of the voting game. The Survey asked respondents to identify and rank their top priorities to guide La Crosse's future. A higher number along the X-axis represents the principle was highly ranked. The highest ranked guiding principle was "Livable Built Environment" followed by "Public Health" and "Natural Resources."

What issues should the City prioritize?

Drag and drop the answer choices below to rank what you feel are the most important Guiding Principles for La Crosse to focus on.

Pedestrian and Bicycle Survey Results

A comprehensive Pedestrian and Bicycle Survey was developed and published to inform recommendations in the Comprehensive Plan. The survey was available through summer and fall of 2022. More than 600 people participated in the survey. Guidance received from the public includes identification of barriers and opportunities for improving conditions for walking and bicycling in La Crosse, as well as participants' preferences for walking and bicycling facilities. Results are organized by mode. Note: numbers preceding questions are not relevant and may be out of order.

I would like to answer questions about

How does winter affect your walking trips?

5. What types of destinations should be prioritized in when deciding where to improve walking conditions?

6. What keeps you from walking more often?

7. What would make it easier and more convenient for you to walk more often?

Pedestrian and Bicycle Survey Results (continued)

9. Facility W-1: How comfortable would you feel walking here?

10. Facility W-2: How comfortable would you feel walking here?

Pedestrian and Bicycle Survey Results (continued)

11. Facility W-3: How comfortable would you feel walking here?

12. Facility W-4: How comfortable would you feel walking here?

Pedestrian and Bicycle Survey Results (continued)

13. Facility W-5: How comfortable would you feel walking here?

W-5

Sidewalk

- » 10' sidewalk along road in commercial district
- » Buffered from traffic by a planted boulevard and a parking lane

How does traffic feel here?

	LOW	MED	HIGH
HOW BUSY ¹			
	Up to 3000	3000-10,000	10,000 +
HOW FAST ² **			
	Up to 30 mph	30-40 mph	40 mph +

¹ Average Annual Daily Traffic (AADT) for all lanes
² Observed (85th percentile) speeds

15. How does winter affect your bicycling trips?

16. What types of destinations should be prioritized in when deciding where to improve biking conditions?

17. What keeps you from riding your bike more?

18. What would make it easier and more convenient for you to ride a bike more often?

Pedestrian and Bicycle Survey Results (continued)

20. Facility B-1: How comfortable would you feel biking here?

21. Facility B-2: How comfortable would you feel biking here?

Pedestrian and Bicycle Survey Results (continued)

22. Facility B-3: How comfortable would you feel biking here?

23. Facility B-4: How comfortable would you feel biking here?

Pedestrian and Bicycle Survey Results (continued)

24. Facility B-5: How comfortable would you feel biking here?

Pedestrian and Bicycle Survey Results (continued)

26. Facility B-7: How comfortable would you feel biking here?
